

Principal's Message

Mr. Gormaz

Dear Edison Families,

At Edison we are continuously looking for opportunities to support our students and families with clear expectations in an effort to ensure a clear focus on our students safety and well being. As part of our regular review, we have updated our Cell Phone and Personal Electronic Device policy. The suggested changes have included input from students and parents in our PBIS Committee as well as our School Leadership Team. Our revised policy better reflects new technologies and will more clearly communicate expectations for our students and our community.

We support family decisions to allow students to carry personal cell phones as a means of increased communication with students after the school day to enable direct communication with your student. We do hope you can take some time to review our updated policy to ensure that students adhere to our expectations during the school day while they are on campus as well as when they continue their day in the After School Program.

One specific way you can support your child is by ensuring you do not initiate communication with your student on their cell phone while at school. If your child initiates a call from their personal device, please remind them to adhere to the policy to go through a staff member or the school office. For the safety of all students, it is important to have all communication go through the classroom teacher or the school office. **In addition, in the most serious of emergencies (which we hope we never encounter), calling a student's cell phone may actually endanger your child, their classmates and our staff.** Thank you in advance for your understanding and support of our updated expectations regarding personal cell phones and other electronic devices.

Respectfully,

Mr. Gormaz

PBIS

Positive Behavior Intervention Supports (PBIS)

- 2/2/24 Spin It (During Lunches)
- 2/16/24 Spin It (During Lunches)
 - TK & kinder have Spin It every Friday

Technology Policy Update

We have a new and improved technology policy at Edison that has been in effect as of Monday, January 29, 2024. We took input from both students and staff to determine a policy that was fair and encourages our students to be responsible with personal technology on our campus. You can view our updated policy on the weekend message attachments.
