Euclid Elementary School

1120 South Euclid Avenue Ontario, CA 91762 (909) 984-5119

PBL-Project-Based Learning

Project Based Learning is a teaching method in which students gain knowledge and skills by working for an extended period of time to investigate and respond to a complex question, problem, or challenge. Essential Elements of PBL include:

- Significant Content At its core, the project is focused on teaching students important knowledge and skills, derived from standards and key concepts at the heart of academic subjects.
- 21st century competencies Students build competencies valuable for today's world, such as problem solving, critical thinking, collaboration, communication, and creativity/innovation, which are explicitly taught and assessed.
- In-Depth Inquiry Students are engaged in an extended, rigorous process of asking questions, using resources, and developing answers.
- Driving Question Project work is focused by an open-ended question that students understand and find intriguing, which captures their task or frames their exploration.
- Need to Know Students see the need to gain knowledge, understand concepts, and apply skills in order to answer the Driving Question and create project products, beginning with an Entry Event that generates interest and curiosity.
- Voice and Choice Students are allowed to make some choices about the products to be created, how they work, and how they use their time, guided by the teacher and depending on age level and PBL experience.
- Critique and Revision The project includes processes for students to give and receive feedback on the quality of their work, leading them to make revisions or conduct further inquiry.

Public Audience - Students present their work to other people, beyond their classmates and teacher.

LEGO Robotics

The LEGO Robotics program is a relevant: a hands-on, minds-on approachthe core of which is the enduringly engaging and versatile LEGO brick – designed to help students take ownership of the learning process, enabling them to actively develop the problem-solving skills and collaboration skills necessary to become creators and critical thinkers.

PBIS

Positive Behavioral Interventions and Supports (PBIS) is an evidence-based, data-driven framework proven to reduce disciplinary incidents, increase a school's sense of safety and support improved academic outcomes. More than 19,000 U.S. schools are implementing PBIS and saving countless instructional hours otherwise lost to discipline. The premise of PBIS is that continual teaching, combined with acknowledgement or feedback of positive student behavior will reduce unnecessary discipline and promote a climate of greater productivity, safety and learning. PBIS schools apply a multi-tiered approach to prevention, using disciplinary data and principles of behavior analysis to develop school-wide, targeted and individualized interventions and supports to improve school climate for all students

Health and Wellness Focus School

Euclid Elementary School, along with our community, commit to academic excellence as a Health & Wellness Focus School by promoting high academic standards, physical activity, good nutrition, and positive choices for each and every child. We offer a Fresh Fruit and Vegetable Snack Program three times a week to promote good health and nutrition. We offer a daily free nutritional breakfast to all of or students to ensure that they begin each day ready to learn.

Euclid Elementary School is committed to excellence through an innovative course of rigorous study, enrichment programs in a safe and healthy community.
